SUMMARY

Full-stack developer in the Austin space-tech corridor focused on user-centered, low-cognitive-load digital experiences. I bridge marketing strategy and technical execution to make complex information intuitive and accessible. Cross-cultural, high-pressure collaboration supporting displaced communities sharpened my clarity and adaptability. With an aerospace focus and real-time, data-driven build experience, I create applications that feel like instruments, not websites.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Accessibility

Backend/Databases: Python, Django, Node.js, Express.js, REST APIs, MongoDB, MySQL

Frameworks & Tools: MEAN Stack, React, WordPress, OOP, Chrome Extension APIs

Cloud & DevOps: AWS, Linux, Git/GitHub, Agile/Scrum, Kanban, Technical Documentation

Specialties: Neurodivergent-aware UX, real-time data interfaces, workflow-focused design

PROJECTS
